

VCE Team Coaching

Teaching VCE English is an experience that bonds teams of teachers as they work together in the pursuit of constant student improvement throughout the year. Using our workshops and knowledge of the study design, we can work with your team on skill development, unique strategies for teaching your texts or argument analysis and assistance with consistent assessment and moderation.

We can visit your school and cover all areas of the study design with your Year Eleven and/or Year Twelve team, or we can work with your teachers throughout the year as you build great units of work and ensure your assessment is effective and equal across classes.

Key aspects:

- Support from experienced former Key Learning Area leader and experienced assessor.
- Can work on any aspect that the school feels is necessary - this can be a general session about all areas of study, or a focus on one or two particular areas which have been identified as needing improvement.
- Support to continue outside of the session in school, with email/online support throughout the school year.
- Assistance in establishing an effective moderation schedule and system - get all of your team 'marking with the same eyes' and using moderation as skill development for teachers.
- Support for leaders in ensuring all members of the VCE teaching team understand the importance of speaking with the one voice.
- Can work with Y11, Y12 teams or both together to ensure that the program is set up to optimise student growth over the two years of VCE.
